

Hall Staff Diary

19th September 2018

Introduction of our hall

First of all, we have to explain of our hall facility, official name of our hall is “Seya public hall”, located in Seya ward Yokohama city.

“Seya Public Hall” has one hall where capacity is 506 seats including 8 wheelchair seats, 6 parent and child seats.

Stage width is 10.8m, depth is 9m, height is 7.8m, and hall has a thick curtain, 4 art batons, 2 suspension batons, 3 wing curtains, one horizontal curtain, one screen, one upper horizontal light, also hall has ceiling lights and front light of right and left.

Both right and left of stage winds are quite small, almost nothing.

To be honest, that's one of big weak point of the hall.

We are able to operate the lighting and sound in the stage left wind, where has 10 faders simple light console and 16 channels simple sound console.

If you want to operate these sub consoles, we can explain you how to use them all the time.

If you would learn more stage technical things, we could explain main light and sound consoles, too.

Please come and use them.
