

Hall Staff Diary

14th November 2018

The occupancy rate

Our business style is to lend a hall and conference rooms in time, so to have our facilities borrowed by a lot of people is that our business will have some success.

It is “the occupancy rate” to check how much we can rent.

In the year 2017, the occupancy rate of the hall use was 88.4%, this number will be used for 296 days against the availability date of 335 days.

I think that it is not bad score, but there is also the possibility of further growth.

By the way, the target value published is 60%.

Occupancy rates are very important numbers for evaluating us.
