Evacuation training

Japan is perhaps the most earthquake-prone country in the world. In this country, we will conduct evacuation drills from kindergarten until retirement age.

Seya public hall is obligated to evacuate drills in 1-2 times a year for public facility staff.

Last month, we held “Evacuation training concert” in corporation with public hall and ward office. It was a content that an earthquake occurred during the concert of the Yokohama Fire Fighter Corp, and all spectators evacuated to the park by interrupting the concert.

About 260 spectators most of whom were elderly people over sixty arrived our hall the day.

It was our first event, but we were able to finish the event without any problem.

We were able to have a fun experience.
